Every worker. Every industry. A strong economy.

WDQC scan shows how states struggle to measure non-degree credential attainment

A new scan from WDQC, “Measuring Non-Degree Credential Attainment,” finds that no state has comprehensive data on non-degree credentials which can make it difficult for states to ensure that they are training workers to meet workforce needs.

However, states can use some of the lessons learned in this scan to collect more useful data. Read more about the scan [here](#).
